NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 INFORMATION ABOUT THE GROUP

Valora is an international retail group. The parent company, Valora Holding AG, which has its head office in Muttenz, Switzerland, is listed on the SIX Swiss Exchange. The Retail business segment of Valora operates small-outlet convenience retail units in heavily frequented locations.

Its Food Service segment maintains an integrated value chain covering all phases from the production of lye bread to sales to wholesalers (B2B) and the operation of takeaway concepts (B2C).

The consolidated financial statements for Valora for the 2018 financial year were approved by the Board of Directors on 18 February 2019. They are subject to approval by the Ordinary General Meeting on 29 March 2019.

2 ACCOUNTING POLICIES

Basis of preparation. In preparing its consolidated financial statements, Valora generally applies the historical cost principle. The exceptions to this are derivative financial instruments, equity instruments measured at fair value and contingent considerations. Consolidation is based on the individual Group companies' financial statements, which are prepared according to a uniform set of accounting principles. The Group presents its accounts in Swiss francs (CHF). Unless otherwise stated, all values are stated in thousands of Swiss francs (CHF 000).

Compliance with IFRS, the Swiss Code of Obligations. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with the legal provisions of the Swiss Code of Obligations.

Significant accounting policies. In addition to the accounts of Valora Holding AG, Muttenz, Switzerland, the Valora Group's financial statements also comprise those of its Group companies as follows:

Consolidated companies. Group companies controlled by Valora Holding AG are fully consolidated. In determining whether control exists, Valora also considers contractual agreements and other rights it may have. Group companies acquired are consolidated from the date Valora obtains control and deconsolidated on the date control is lost.

Consolidation method. All intra-Group assets, liabilities, income and expenses, and all unrealised gains or losses from intra-Group transactions, are fully eliminated. When companies are acquired, all identifiable assets, liabilities and contingent liabilities of the acquired entity are recognised at fair value at the acquisition date, and the difference between the consideration paid and the fair value of the company's net assets at the time of the acquisition is recognised as goodwill.

Associated companies and joint ventures. Associates and joint ventures are accounted for using the equity method. Associates are companies over which Valora has significant influence, but that it does not control. Significant influence is assumed to exist when Valora holds between 20% and 50% of the voting shares. A joint venture is an entity over which Valora has joint control. Scope of consolidation. Note 38 provides an overview of Valora's significant Group companies.

Changes in consolidation scope. Valora acquired Presse + Buch Grauert based in Düsseldorf, Germany in an asset deal on 1 April 2018.

Valora acquired 100% of the shares of BackWerk GmbH, based in Essen, Germany, as of 26 October 2017. On 26 January 2017, Valora acquired Pretzel Baron, based in Cincinnati, Ohio/USA, a producer of high quality frozen pretzels with own production facilities.

Additional information concerning these transactions can be found in note 6.

3 CHANGES TO ACCOUNTING POLICIES

 $Implementation\ of\ new\ International\ Financial\ Reporting\ Standards\ (IFRS)\ and\ Interpretations\ thereof.$

IFRS 9. Financial instruments is applied since 1 January 2018. Comparative numbers for the prior year have not been restated and are presented according to IAS 39/IFRS 7 and the accounting policies described in the annual report 2017.

IFRS 9 replaces IAS 39 and changes classification and measurement of financial instruments, particularly financial assets and hedge accounting. Under IFRS 9 the classification of financial assets depends on the instrument's contractual cash flow characteristics and the Group's business model for managing them. The Group classifies its financial instruments, at initital recognition, as subsequently measured at amortised cost or at fair value through profit and loss.

Valora initially measures its financial assets at fair value and, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables, however, are initially measured at the transaction price determined under IFRS 15. Financial assets at amortised cost are subsequently accounted for using the effective interest rate method and are subject to impairment using the expected credit loss model. All the Group's financial assets previously classified as loans and receivables under IAS 39 continue to be measured at amortised cost as they are held to collect contractual cash flows which comprise principal and interest payments only.

Financial instruments available for sale were reclassified to financial instruments at fair value through profit and loss on January 1, 2018. This reclassification had no material effects on the consolidated financial statements. There was no change with respect to financial assets at fair value through profit and loss and financial liabilities.

Valora has changed the method for measuring impairments of financial assets from the "incurred loss model" (under IAS 39) to the "expected credit loss model" (under IFRS 9). For trade accounts receivable and lease receivables Valora uses the simplified approach and recognises lifetime expected credit losses. This change did not have a material impact and retained earnings were not affected on 1 January 2018. The application of the new hedge accounting rules did not have an impact either. Additional disclosures are made in these financial statements.

IFRS 15. Revenue from Contracts with Customers became mandatory from 1 January 2018 and has been applied by Valora retrospectively as of 1 January 2017 by restating comparative information (full retrospective method). The standard replaces IAS 18 Revenue and IAS 11 Construction

Contracts and affects the definition, scope and timing of revenue recognition. Revenue is recognised when control of goods or services is transferred to the customer in an amount that reflects the consideration to which Valora expects to be entitled in exchange for the goods and services transferred.

Valora sells goods and provides services in sales outlets, operates franchise concepts and produces goods for wholesale customers. Revenue recognition from the sale of goods (including goods produced by Valora) has not changed as a result of IFRS 15.

Valora provides franchisees with access to the Valora network including access to the relevant formats and brands and know-how. Valora recognises the related franchise fees over time as the franchisees receive the benefits of the services performed. Franchisees generally purchase goods on their own behalf and these are therefore not reported within revenues and costs of goods and materials of Valora. In cases franchisees purchase goods via Valora those are reported within revenues and cost of goods and materials. Revenue is recognised when franchisees obtain control of the goods at the sales outlet.

Valora provides suppliers with certain advertising services and promotional activities in exchange for consideration. These arrangements have been analysed using the new revenue guidance and definitions in IFRS 15. Where it has been concluded that consideration received from suppliers does not represent payment for a distinct service rendered by Valora to a customer but is more closely related to the products purchased from these suppliers for sale in the Group's own sales outlets, such payments are now accounted for as a reduction of the acquisition cost of goods and materials. This change in accounting policy has impacted revenue and cost of goods and materials 2018 by CHF 78.7 million. Revenue 2017 previously reported as CHF 2,075 million was reduced by CHF 73.6 million to CHF 2,002 million and there has been a corresponding decrease in the cost of goods and materials of CHF 73.6 million. Details are provided in note 8.

The adoption of IFRS 15 had no impact on the net results reported but has led to additional disclosures, refer to Note 9.

Other standards and interpretations (IFRIC 22). IFRIC 22 is in force since 1 January 2018, but has not had a material impact on financial reporting.

Future implementation of International Financial Reporting Standards (IFRS) and Interpretations. The following amendments and new standards and interpretations will become effective in future accounting periods and are potentially relevant for the group:

IFRS 16. IFRS 16 Leases replaces IAS 17 and becomes effective from 1 January 2019. Under the new lease accounting model lessees will recognise a right-of-use asset and a lease liability for most leases. Exceptions apply to low-value assets and short-term leases with terms of less than twelve months. At Valora these primarily include IT equipment, but also equipment for the sales outlets. Lease payments for these types of contracts will continue to be recognised as operating expenses. Lessor accounting will essentially remain unchanged and operating and finance leases will continue to be accounted for differently. The classification of subleases will be determined by reference to the right-of-use asset arising from the head lease.

Valora as a lessee has a large number of lease contracts mainly related to sales outlets which include both fixed and variable sales-based lease payments. In the course of 2018 Valora analysed its more than 2,800 head leases (Valora as lessee) and around 900 subleases (Valora as lessor) for sales outlets and related franchise contracts. Due to the new guidance for sub-leases many of them represent finance leases under IFRS 16 and the corresponding right-of-use asset from the head lease will be replaced by a lease receivable. Valora will measure the right-of-use assets initially at the amount of the lease liability adjusted for any prepaid or accrued lease payments. At initial application on 1 January 2019 an estimated lease liability of approximately CHF 600 million will be recognised for the present value of fixed lease payments. For sub-lease contracts that will be classified as finance leases the right of use assets will be derecognised and a lease receivable

recognised, resulting in estimated total right-of-use assets of CHF 527 million and lease receivables of CHF 71 million at 1 January 2019. Rental income from these subleases is currently reported within revenue (CHF 25 million in 2018) and therefore revenue will decrease following the application of IFRS 16. Rental expense will decrease and be replaced by depreciation of the right-of-use assets and interest expenses on the lease liabilities.

Cash flows related to the repayment of lease liabilities will be presented as financing and interest payments as operating cash outflows. Cash inflows against sublease receivables will be investing and interest received operating cash flows.

Valora will apply the modified retrospective method, which involves the recognition of the cumulative effect of initially applying IFRS 16 as at 1 January 2019 in retained earnings with no restatement of prior years. In addition to the above changes the new accounting standard will lead to new disclosures.

Other standards and interpretations (IFRIC 23, Annual Improvements 2015–2017 Cycle). IFRIC 23 and the Annual Improvements 2015-17 Cycle will become effective on 1 January 2019. These changes will not have a material impact on the Group's financial statements.

4 GENERAL ACCOUNTING POLICIES

Translation of foreign currencies. Transactions in foreign currencies are translated into the functional currency at the prevailing exchange rate on the date of the transaction. On the balance sheet date, assets and liabilities in foreign currencies are translated using the exchange rates at the balance sheet date and the resulting exchange differences are recognised in profit or loss. The assets and liabilities of Group companies whose functional currency is not the Swiss franc are translated into Swiss francs on the balance sheet date. The income statement, cash flow statement and items of other comprehensive income are translated using the average exchange rate for the reporting period, provided this results in a reasonable approximation of the results that would be obtained when applying the transaction rates. Otherwise the items are translated using the transaction rates. Translation differences resulting from the translation of the financial statements of Group companies are recognised in the statement of comprehensive income (other comprehensive income) and reported separately.

Translation rates used for Valora's major foreign currencies

	Average rate for 2018	Closing rate on 31.12.2018	Average rate for 2017	Closing rate on	
Euro, EUR 1	1.155	1.126	1.112	1.170	
US dollar, USD 1	0.978	0.982	0.985	0.974	

Rounding. Due to rounding, this report may contain minor discrepancies between totals and percentages and their component elements.

Net revenue and revenue recognition. Valora sells goods and services in sales outlets, operates franchise concepts and produces goods for wholesale customers. Net revenue presented in the income statement comprises both revenue from contracts with customers (IFRS 15) and other sources of revenue.

Net revenues from contracts with customers (IFRS 15) include all proceeds from the sale of goods (including goods produced by Valora) and services, net of any deductions including rebates, discounts and other agreed deductions.

Revenue from products and services sold in sales outlets represents the cash payments received and is recognised when the payment is made in cash or charged to a credit card. Customer loyalty programmes are estimated on the basis of empirical values.

Revenue from goods produced and sold by Valora is recognised when the goods are transferred to the customer according to the terms of the contract. The revenue that is recognised is the consideration that Valora expects to be entitled to in exchange for these goods and falls within the scope of IFRS 15.

Valora provides franchisees with access to the Valora network including access to the relevant formats and brands and know-how. Valora recognises the related franchise fees over time as the franchisees receive the benefits of the services performed. Franchisees generally purchase goods on their own behalf and these are therefore not reported within revenues and costs of goods and materials of Valora. In cases franchisees purchase goods via Valora those are reported within revenues and cost of goods and materials. Revenue is recognised when franchisees obtain control of the goods at the sales outlet. Franchise fees are recognised as revenues and qualify as net revenues according to IFRS 15.

Commissions that Valora receives from its suppliers when acting as an agent are also reported as net revenue, as is income from the rendering of services from franchise outlets. These do not, however, fall within the scope of IFRS 15 Revenue from Contracts with Customers.

Net revenue also includes income from rental agreements concluded with franchisees which falls outside the scope of IFRS 15.

Cost of goods and materials. The cost of goods and materials includes the acquisition or production costs of the goods and the materials. It includes valuation allowances for non or slow moving goods, but also reimbursements from suppliers for the achievement of certain purchase quantities or reference values, which are recognised as a reduction in expenses. Payments received from suppliers for advertising services and promotional activities that do not qualify as distinct services under IFRS 15 are recognised as a reduction of the cost of goods and materials.

Share-based remuneration. The Valora Group settles part of its employee remuneration in Valora shares. The expense recognised in the income statement as a result of share-based remuneration is calculated by multiplying the number of shares expected to vest by the grant date fair value of the Valora equity instruments granted (net of any amounts to be paid by the recipients of the equity instruments). The expense for plans that are settled in shares (equity settled) is recognised in equity; the expense for cash-settled plans is recognised as liability. If the vesting conditions extend over several periods, the expense is spread over the vesting period taking into account the expected achievement of targets. Share-based remuneration that is settled in cash is remeasured at each balance sheet date until settlement.

Financial result. Net gains and losses on financial instruments at fair value through profit or loss do not include any dividend or interest payments. Dividend and interest income is reported separately (see Note 14). The introduction of IFRS 9 had no material impact on the financial result.

Income taxes. Income tax is calculated on the basis of the applicable tax laws in each tax jurisdiction and charged to the income statement for the accounting period in which the net income is recognised. The effective tax rate is applied to the annual profit.

Deferred income taxes that arise as a result of temporary differences between the values of assets and liabilities reported in the consolidated balance sheet and their tax values are recognised as deferred tax assets or deferred tax liabilities. Deferred tax assets are capitalised when it is probable that there will be sufficient taxable income to against which the deductible differences can be utilised. The assessment relates to the period for which planning data is available.

Deferred income taxes are calculated on the basis of the tax rates that are expected to apply during the period when the deferred tax asset is realised or the liability is settled. Deferred tax liabilities for temporary differences are generally recognised. Tax receivables and tax liabilities are offset against one another if they are for the same taxable entity and there is an enforceable right to offset them. Changes to deferred tax assets and deferred tax liabilities are recognised as a tax expense/income in the income statement. This does not apply to deferred taxes for items recognised in other comprehensive income or directly in equity.

Net profit/loss from discontinued operations. On disposal of a segment or separate major line of business the related income is reported separately as net income/loss from discontinued operations. In the cash flow statement, only continuing operations are presented in detail and the operating, investing and financing cash flows from discontinued operations are aggregated in one line.

Earnings per share. Earnings per share are calculated by dividing the net profit/loss attributable to Valora Holding AG shareholders by the average number of outstanding shares of Valora Holding AG. For diluted earnings per share, any potentially dilutive effects on the number of outstanding shares are taken into account and the net profit is adjusted, if necessary.

Financial Assets. Financial assets are classified at initial recognition at amortised cost or fair value through profit and loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and Valora's business model for manag-

ing them. With the exception of trade receivables Valora measures a financial asset at its fair value and, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables are measured at the transaction price determined under IFRS 15. In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding. Purchases or sales on financial assets that require delivery of assets within a time frame established by regulation or convention in the market place are recognised on the trade date, i.e. the date that the Group commits to purchase or sell the asset.

For subsequent measurement, financial assets are classified in the following categories:

- Financial assets at amortised cost (debt instruments) They are subsequently measured
 using the effective interest rate method and are subject to impairment. Gains and losses
 are recognised in profit or loss when the asset is derecognised, modified or impaired. Valora's
 financial assets at amortised cost include cash and cash equivalents, trade accounts
 receivable, receivables from finance leases and other financial receivables.
- Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value such as contigent consideration arrangements entered into as part of business combinations. Financial assets are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Valora's financial assets at fair value through profit or loss include receivables from contingent consideration arrangements, derivatives and equity investments (unlisted equity interests with a shareholding of less than 20%).

Financial assets are classified as current unless the due date is more than 12 months after the balance sheet date.

Valora uses the simplified approach when measuring the expected credit loss allowance of trade accounts receivable and finance lease receivables that fall within the scope of IFRS 15 and do not contain any significant financing components. Under this approach, an impairment loss is recognised at each balance sheet date in the amount of the expected credit losses over the entire term (lifetime expected loss), rather than the change in the default risk. The impairment is determined by using historically observable data as well as forward-looking information. Depending on the credit rating of the customer cluster, the ageing structure of the receivables and historic default rates the expected credit losses are determined.

For all other financial assets measured at amortised costs impairments on expected losses are determined according to the three-bucket model.

Cash and cash equivalents. Cash and cash equivalents include cash on hand, demand deposits with banks and short-term money market investments with a maximum term of three months from their date of acquisition which are readily convertible to cash and cash equivalents and are subject to insignificant fluctuations in value.

Trade accounts receivable. Trade accounts receivable are largely attributable to the franchise business, the wholesale business and other deliveries of goods, as well as the provision of services.

Loans, receivables from finance leases and other receivables. Loans, receivables from finance leases and other receivables are classified as current unless the due date is more than 12 months after the balance sheet date.

One Valora Group company sells its accounts receivables to a bank. As all material risks from the receivables are transferred to the bank upon sale, the corresponding assets and liabilities are derecognised. In certain defined cases – if non-compliant loan agreements were entered into with

borrowers – the bank would be entitled to reverse the transaction. In this case, the risk is limited to the value of the receivable.

Accounting of derivative financial instruments and hedging transactions. Derivative financial instruments are recognised in the balance sheet at fair value and adjusted for changes in fair value. How the gain or loss is recognised depends on whether the instrument serves to hedge a specific risk and if the conditions for hedge accounting have been met. The purpose of hedge accounting is to offset the change in fair value of the hedged item and the hedging instrument over the term of the hedge. If a derivative financial instrument is not designated as a hedging transaction or the conditions for recognising it as a hedging transaction have not been met, the gains and losses from changes in the fair value of derivatives are recognised in the income statement. To qualify for hedge accounting, a hedge must meet strict conditions related to documentation, the likelihood of occurrence, the effectiveness of the hedging instrument and the reliability of measurement. When entering into a hedging transaction, the Group documents the relationship between hedging instruments and the hedged items as well as the purpose and strategy of the hedge. The group has entered into cash flow hedges such as interest swaps.

Gains and losses from hedging instruments that are attributable to the effective portion of the change in the fair value of derivative financial instruments designated as cash flow hedges are recognised in other comprehensive income. The gain or loss attributable to the ineffective portion is recognised immediately in profit or loss. If the underlying transaction is no longer expected to take place, the cumulative gains and losses are immediately transferred to the income statement.

Financial liabilities. Financial liabilities are classified, at initial recognition, as subsequently measured at amortised cost or fair value through profit and loss.

Financial liabilities at amortised costs are initially measured at fair value net of transaction costs and subsequently measured at amortised cost using the effective interest rate method. Valora's financial liabilities at amortised cost include current financial liabilities, trade accounts payable, other financial payables and interest bearing debt (non-current financial liabilities). Valora classifies financial liabilities as non-current if it has the unconditional right at the balance sheet date to defer their repayment until at least twelve months after the balance sheet date.

Financial liabilities at fair value through profit or loss include financial liabilities designated upon initial recognition at fair value through profit or loss, or financial liabilities mandatorily required to be measured at fair value. Derivatives fall under this category unless they are designated as effective hedging instruments. Valora's financial liabilities at fair value through profit or loss include financial liabilities from contingent consideration arrangements agreed as part of business combination and derivatives with a negative fair value.

Inventories. Inventories are measured at the lower of acquisition/production cost and net realisable value. At Ditsch/Brezelkönig, semi-finished and finished goods are initially valued at production cost. The other inventories of Ditsch/Brezelkönig and the inventories of all other business units are initially measured at weighted average cost. Inventories that cannot be sold or that have a low turnover are partially or fully written off.

Property, plant and equipment. Property, plant and equipment is recognised at cost, less accumulated depreciation. Subsequent expenditure for refurbishments is capitalised only if the costs can be determined reliably and the work results in an increase of the value of the asset. Other repair and maintenance expense is charged directly to the income statement.

Capitalised leasehold improvements of rented premises are depreciated over their estimated useful lives or shorter lease term.

Depreciation is calculated using the straight-line method based on the estimated useful lives:

	Years
Land	no depreciation
Buildings and building components	20-40
Machines, equipment, installations and furniture	6-10
Production facilities	15-20
Vehicles	5
IT hardware	3-5

Impairment of property, plant and equipment. The recoverability of property, plant and equipment is reviewed whenever there are indications that the carrying amounts may be overstated due to changed circumstances or events. If the carrying amount exceeds the recoverable amount, which is the higher of fair value, less costs of disposal, and value in use, the carrying amount is reduced to the recoverable amount. A previously recognised impairment is reversed only if there has been a change in the estimates used to determine the recoverable amount since the recognition of the last impairment. In this case, the carrying amount of the asset is increased to its recoverable amount. However, this amount may not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognised in previous years. A reversal is immediately recognised through profit or loss.

Valora's impairment losses largely relate to equipment for the sales outlets. The earnings situation of sales outlets is analysed as part of the multi-year planning process. In the case of sales outlets that continue to generate negative results, property, plant and equipment is impaired.

Leases. Assets acquired under lease agreements and where the significant risks and rewards of ownership are transferred to Valora as lessee are recognised as fixed or intangible assets in accordance with the nature of the leased asset. Assets under finance leases are initially recognised at the fair value of the leased asset or at the lower net present value of future minimum lease payments. A liability from financial leases is recognised in the same amount. The leased assets are depreciated over their useful lives or, if it is not reasonably certain that ownership will be transferred at the end of the lease period, over the shorter lease term.

Similarly, property, plant and equipment that is made available for use to third parties for consideration is not reported as property, plant and equipment; instead, the present value of future lease payments is recognised as a financial asset, provided the related significant risks and rewards of ownership of the assets are substantially transferred to the lessee. Expenses from operating leases and rental income from sublease contracts that are accounted for as operating leases are recognised in profit or loss on a straight-line basis over the lease term.

Intangible assets (excluding goodwill). Intangible assets are classified as software, intangible assets with finite useful lives and intangible assets with indefinite useful lives.

Software and intangible assets with finite useful lives are recognised at acquisition or production cost, less accumulated amortisation. Amortisation is calculated using the straight-line method over the estimated useful lives of the assets.

Intangible assets with indefinite useful lives. Intangible assets with indefinite useful lives are not amortised on a systematic basis, instead they are tested for impairment at least once a year.

Amortisation is calculated using the straight-line method based on the following estimated useful lives:

	Years
Software	3-5
Intangible assets with finite useful lives	3-20
Intangible assets with indefinite useful lives	No amortisation

Impairment of intangible assets. The recoverability of intangible assets is reviewed whenever there are indications that the carrying amounts may be overstated due to changed circumstances or events. If the carrying amount exceeds the recoverable amount, which is the higher of fair value, less costs of disposal, and value in use, the carrying amount is reduced to the recoverable amount. A previously recognised impairment of intangible assets (excluding goodwill) is reversed if there has been a change in the estimates used to determine the recoverable amount since the recognition of the last impairment. If this is the case, the carrying amount of the asset is increased to its recoverable amount. However, this amount may not exceed the carrying amount that would have been determined (net of amortisation) had no impairment loss been recognised in previous years. A reversal is immediately recognised in profit or loss.

Goodwill. Goodwill is the amount the Group pays in excess of the fair value of the identifable net assets of an acquired business. Goodwill is capitalised and allocated to the cash-generating unit ("CGU") that expects to benefit from the business combination. Goodwill is subject to an annual impairment test, or whenever there are indications of a possible impairment. For this purpose, the carrying amount of the cash-generating unit to which the goodwill was allocated is compared to its recoverable amount. The recoverable amount represents the higher of the fair value, less costs of disposal, of the cash-generating unit and its value in use. The fair value, less costs of disposal, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as at the measurement date. If the carrying amount of the cash-generating unit exceeds the recoverable amount, an impairment loss is recognised. Reversals of goodwill impairment are prohibited.

Provisions. Provisions are set up if – as a result of past events – an obligation has been incurred, the amount of which can be reliably estimated and for which it is probable that there will be an outflow of economic benefits. Provisions are recognised at the present value of the estimated cash outflows as of the balance sheet date. Provisions for onerous lease contracts are recognised at the lower of the penalties to exit from the contract and the unavoidable costs (net of any expected sublease income) of meeting the obligations under the contract over the remaining lease term.

Pension obligations. Valora pays its pension contributions to various pension schemes established in accordance with local regulations. For defined benefit pension plans, the present value of the defined benefit obligation is determined on the basis of annual actuarial reports using the "projected unit credit" method. This takes account of the years of service, benefits that accrue to employees at the balance sheet date as well as expected future changes in salary. The employer's pension expenses and the net interest expense or income for the net pension liability or asset are recognised in the income statement during the period in which they occur. The actuarial gains and losses as well as the effect of any limit on the pension assets (IFRIC 14) are recognised in other comprehensive income. The expense for defined contribution plans is recognised in the income statement on an accrual basis.

5 MANAGEMENT ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

Key judgements when applying accounting principles. The application of accounting policies for the Group requires the exercise of significant judgements by management that can have a material impact on the amounts reported in the consolidated financial statements. Estimates by management are necessary when assessing the substance of complex transactions.

Significant estimates. The preparation of the consolidated financial statements in accordance with IFRS requires the use of estimates that relate to the future and affect the presentation of certain items in the income statement, statement of comprehensive income, balance sheet, cash flow statement and related notes. The estimates underlying the values in the consolidated financial statements are based on experience and the information available at the time of preparation. Estimates and assumptions are reviewed regularly and adjusted if necessary. However, actual outcomes may deviate from the estimates. Changes in estimates are included in the consolidated financial statements in the year when the adjustment is made. Estimates and assumptions that involve a significant risk regarding future material adjustments to carrying amounts are explained below:

Property, plant and equipment. The useful lives of property, plant and equipment are determined on historical evidence, taking account of current technical conditions. The actual useful lives may differ from the originally determined useful lives as a result of technological changes and changed market conditions. In the event of such deviations, the remaining useful lives are adjusted. The recoverability of property, plant and equipment is always reviewed if it seems possible that the carrying amounts have been overstated due to changed circumstances. Recoverability is determined on the basis of management's estimates and assumptions regarding the economic benefits of these assets. The actual values obtained in the future may differ from these estimates (see Note 21). When analysing onerous contracts, Valora assesses the profitability of each store. For each store with an expected persisting negative profit contribution the carrying amount of its assets is impaired as a result.

Goodwill, trademark rights and other intangible assets (Franchises). Intangible assets with infinite useful lives like goodwill and trademark rights are tested for impairment if there are indications of a lower recoverable amount or at least annually.

The recoverable amount is based on the estimated future free cash flows (DCF valuation method) of the respective units (CGUs). The recoverable amount is mainly affected by estimated net revenues, the estimated operating profit margin and the applied discount rate.

The carrying amount of franchise contracts (BackWerk) is assessed annually for impairment. The recoverable amount is determined using a discounted cash flow model. Optional renewals are assumed to be exercised and fully considered in the model.

Intangible assets with infinite useful lives are impaired when there are indications for impairment.

Pension assets and long-term pension obligations. The Group has pension schemes whose benefits are considered defined benefits under IFRS. As a result, the fair value of plan assets is compared annually with the dynamically calculated present value of the benefit obligations. The resulting net pension asset (in case of a surplus that is available to the Group) is capitalised or the net pension liability (in case of a plan deficit) is recognised in the consolidated balance sheet. These calculations depend on different assumptions. The most important are the discount rate used to discount future benefits and the changes in the salaries of the beneficiaries (see Note 29). The actual change may differ significantly from the assumptions.

Deferred tax assets. Under IFRS, deferred tax assets are recognised for tax loss carryforwards in an amount equal to the amount of expected future tax savings (see Note 15). The amount of future tax benefits depends on the amount of future profits earned within the period until expiry of the tax loss carryforwards. Accordingly, future results may be adversely affected by write-offs on tax assets if future results are below expectation or may be positively impacted if unrecognised losses of prior periods can be utilised.

6 ACQUISITIONS AND DISPOSAL OF BUSINESS UNITS

Transactions in 2018.

Acquisition of Presse + Buch Grauert. Valora acquired Presse + Buch Grauert based in Düsseldorf, Germany, in the context of an asset deal on 1 April 2018. The acquisition included two sales outlets, which were allocated to Retail Germany.

The purchase price for the acquisition was CHF 4.4 million, of which CHF 4.0 million was paid in cash in April 2018 and CHF 0.4 million was outstanding in a contingent consideration arrangement. The payment will be due in April 2019 and represents a security deposit that Valora claimed as part of the purchase agreement.

The purchase price mainly covered payment for the acquired inventory, the furnishings and fittings for the sales outlets, and other intangible assets.

Since the acquisition date, Presse + Buch Grauert has contributed net revenue of CHF 6.4 million with no material impact on net profit. If the acquisition had been made on 1 January 2018, net revenue for 2018 would have been CHF 8.5 million with no material impact on net profit.

Transactions in 2017.

Acquisition of BackWerk. Valora acquired 100% of the shares of BackWerk GmbH, based in Essen, Germany, as of 26 October 2017. The company, which was allocated to the Food Service segment, operates a franchise network of over 340 outlets in locations mainly in Germany, Austria and the Netherlands. This transaction will enable Valora to benefit from new growth potential in its core markets through significant sales and margin synergies and to significantly expand its presence in the German out-of-home market.

Acquired net assets, payment of the purchase price, cash outflow

	Fair value of BackWerk
in CHF 000	
Current assets	23414
Intangible assets	58 135
Other non-current assets	6947
Deferred tax assets	4 2 0 1
Current liabilities	-5223
Other non-current liabilities	-11951
= Acquired net assets	75 523
Goodwill	159 096
= Purchase price	234619
Cash and cash equivalents acquired	10360
= Total Cash outflow from the acquisition of subsidiaries	224 258
Thereof paid in 2017	223 096
Thereof paid in 2018	1 162

The fair value of the intangible assets in the amount of CHF 58 million relates to franchise agreements and was determined using the multi-period excess earnings method. The intangible assets are amortised on straight-line basis over the estimated useful lives (10 years).

Goodwill of CHF 159.1 million represents expected sales and margin synergies from the acquisition and the acquired work force. The reported goodwill is not tax-deductible.

Current assets include receivables with a fair value of CHF 10.6 million and a gross amount of CHF 15.8 million.

From the acquisition date, BackWerk contributed net revenues of CHF 11.0 million with no material impact on net profit. If the acquisition had taken place on 1 January 2017, management estimates the impact on net revenues would have been CHF 61.8 million with no material impact on net profit.

Goodwill was allocated to the cash generating unit Food Service Europe.

The transaction costs directly attributable to the acquisition amounted to a total of CHF 4.1 million and are included in other operating expenses (management and administration expenses) of the previous year.

The purchase price for the acquisition was CHF 234.6 million, of which CHF 233.4 million was paid in 2017 and CHF 1.2 million was paid in November 2018. The contingent consideration paid in 2018 was depending on the signing of specific rental agreements.

Acquisition of Pretzel Baron (Ditsch USA). On 26 January 2017, Valora acquired the pretzel producer Pretzel Baron, based in Cincinnati, Ohio/USA. The acquisition contributes to Valora's international expansion and fast market entry to the USA. Having a US production facility on its own Pretzel Baron will enable Valora to expand its growing B2B business.

During 2018 Pretzel Baron was renamed to Ditsch USA LLC.

Acquired net assets, payment of the purchase price, cash outflow

	Fair value of Pretzel Baron
in CHF 000	
Current assets	157
Property, plant and equipment	7 4 1 9
= Acquired net assets	7 576
Goodwill	3 388
= Purchase price	10964
= Total Cash outflow from the acquisition of subsidiaries	10964
Thereof paid in 2017	10 049
Thereof paid in 2018	915

The goodwill of CHF 3.4 million represents the acquired work force, the market entry and expected synergies from the acquisition. It is assumed that the goodwill is fully deductible for tax purposes.

The purchase price for the acquisition was CHF 11.0 million. Thereof CHF 10.1 million was paid in 2017 and CHF 0.9 million in June 2018.

7 DISCONTINUED OPERATIONS

Valora sold the Trade division to the Aurelius Group on 31 December 2015. The purchase price included a conditional earn-out in the amount of CHF 20 million distributed to the financial years 2016 to 2018. The earn-out is calculated as a percentage of the relevant consolidated EBITDA for these years exceeding contractually defined thresholds. At the time of the sale, based on the planning at that stage, the earn-out receivable was measured at a fair value of CHF 16.3 million. The fair value of the earn-out was reduced by CHF 8.7 million in 2017 on receipt of initial information from the buyer. At the same time, a total of CHF 7.7 million was released from guarantee provisions and purchase price accruals due to the expiration of limitation period. After recognition of further income in the amount of CHF 1.0 million discontinued operation resulted in a net profit of CHF 31 thousand in 2017.

According to further information from the buyer, it appeared at 31 December 2018 that the consolidated EBITDA of the disposed Trade division in 2018 was likely to fall below the relevant threshold, so that no payment could be expected anymore. The fair value of the receivable was reduced from CHF 7.6 million to zero in 2018. At the same time, an additional release of the guarantee provision in the amount of CHF 2.6 million was possible, as the conditions for claiming no longer applied (see Note 27). As a result, the loss on discontinued operations in 2018 amounted to CHF 5.1 million.

8 SEGMENT REPORTING

The Valora Group is an international retail group whose business activities are divided into the following reportable segments:

Valora Retail: Valora Retail operates small sales outlets at heavily frequented locations in Switzerland, Germany, Luxembourg and Austria. The division operates country-wide marketing and distribution systems for press products, tobacco and consumer products for everyday needs as well as impulse purchases. Valora Retail's brands include the k kiosk, k presse + buch, avec, P & B, ServiceStore DB and CIGO formats, among other brands.

Food Service: Food Service has an integrated value chain covering all phases from the production of lye bread to sales to wholesalers (B2B) and the operation of takeaway concepts (B2C). Lye pretzels and other bakery goods are produced by Ditsch/Brezelkönig in Germany and Switzerland as well as by Pretzel Baron in the USA (Ditsch USA). They are sold both at the division's own sales outlets (agencies) in Germany, France, Austria and Switzerland, and via the wholesale distribution channel. Another component of the segment is the acquired sales channel BackWerk, which has sales outlets in Germany, Austria, the Netherlands and Switzerland. The segment also includes Caffè Spettacolo, one of Switzerland's leading coffee-bar chains.

Other: The Group support functions Finance, Human Resources, Business Development, Legal Services and Communications as well as bob Finance are combined in "Other". The assets mainly include loans to Group companies, cash and cash equivalents and short-term receivables. The segment liabilities comprise the financing instruments listed in Note 25.

The reportable segments include various formats and geographic regions. The net revenues for the reportable segments mainly relate to the sale of goods. Non-current assets comprise property, plant and equipment and intangible assets (additions without changes to the scope of consolidation). The internal and external reporting is based on the same measurement principles.

Segment data

2018	Valora Retail	Food Service	Other	Elimination	Group total

10 PERSONNEL EXPENSES

10 PERSONNEL EXPENSES	2018	2017
in CHF 000		
Wages and salaries	212453	198850
Social security expenses	35814	32 992
Share-based remuneration	3 187	2758
Other personnel expenses	13 165	11776
Total personnel expenses	264 620	246 376
Headcount in full-time equivalents as at 31 December	4230	4 2 6 5

Social security expenses include expenses for defined contribution plans of TCHF 170 (2017: TCHF 181). Other personnel expenses include, in particular, compensation paid to recruiters or temporary staff and expenses for training and staff recruitment. Compared with the same period of the previous year, the higher personnel expenses are mainly attributable to the acquisition of BackWerk at the end of October 2017.

²⁾ Includes franchise fees. Income from services represents mainly commission income.

³⁾ Net revenue was restated as a result of the introduction of IFRS 15; see Note 8.

Management and administration	29848	28337
Capital and other taxes	971	843
Other operating leases	3419	2416
Impairment losses on accounts receivables	959	908
Other operating expenses	29575	27 245
Total other operating expenses	549865	496717

The increase in total other operating expenses is mainly due to the acquisition of BackWerk.

12 OTHER INCOME AND OTHER EXPENSES

	2018	2017	
in CHF 000			
Gain from disposal of non-current assets	962	3 593	
Other income	6371	4031	
Total other income	7 3 3 2	7 623	

Other income includes contributions to building costs, contributions from insurances and reimbursements received. The profit from the sale of assets in 2017 is primarily due to the disposal of the building "La Praille" in Geneva.

	2018	2017	
in CHF 000			
Loss from the disposal of non-current assets	-1501	-1663	
Other expenses	-675	-1353	
Total other expenses	-2176	-3017	

13 FINANCIAL EXPENSE

13 FINANCIAL EXPENSE	2018	2017
in CHF 000		
Interest expenses on bank loans and liabilities	7 639	5813
Interest on bond	1146	6779
Interest on financial leases	0	9
Net loss on derivative financial instruments	0	883
Foreign exchange losses, net	1 630	0
Total financial expense	10416	13 484

14 FINANCIAL INCOME

14 FINANCIAL INCOME	2018	2017	
in CHF 000			
Interest income from cash and cash equivalents, loans and receivables	329	570	
Interest income from financial leases	127	195	
Dividend income from other non-current financial assets	35	34	
Dividend income from at equity investment	107	0	
Foreign exchange gains, net	0	2 132	
Total financial income	598	2931	

15 INCOME TAXES

Income tax is broken down as follows:

	2018	2017
in CHF 000		
Current income tax expenses	3388	2884
Deferred income tax expenses	12513	8 4 5 9
Total income tax	15901	11 343

The reconciliation of income taxes at the expected Group tax rate with the reported income tax can be reconciled as follows:

	2018	2017
in CHF 000		
Earnings before income taxes	80 000	68 462
Expected average Group tax rate	18.8%	19.8%
Income taxes at the expected Group tax rate	15 040	13 573
Expenses not recognised for tax purposes/non-taxable income	2201	1 539
Utilisation of previously unrecognised tax loss carryforwards	-2701	-2644
Effects on current income taxes from prior periods	-163	-337
Recognition of valuation allowances for deferred income taxes	2 2 3 2	980
Reversal of valuation allowances for deferred tax assets	-1273	-1550
Changes in tax rates	115	412
Other effects	450	-630
Total reported income taxes	15901	11343
Effective tax rate	19.9%	16.6%

In calculating the expected Group tax rate, the individual tax rates for the taxable entities are taken into account on a weighted basis. Compared to the previous year, the expected average Group tax rate decreased due to the changed composition of the earnings before income tax of the operational companies.

The change in deferred income taxes is as follows:

Change in deferred tax assets/liabilities	Deferred tax assets	Deferred tax liabilities	Net assets/(net liabilities)
in CHF 000			
Balance on 31 December 2016	38 624	-26689	11936
Deferred taxes recognised in the income statement	-12770	4310	-8460
Deferred taxes recognised in other comprehensive income	0	357	357
Change in consolidation scope	4018	0	4018
Currency translation differences	1888	-1429	458
Offsetting	-16286	16286	0
Balance on 31 December 2017	15 474	-7166	8 3 0 9
Deferred taxes recognised in the income statement	-7042	-5471	-12513
Deferred taxes recognised in other comprehensive income	0	213	213
Currency translation differences	-858	567	-291
Offsetting	2637	-2637	0
Balance on 31 December 2018	10212	-14495	-4282

The deferred taxes recognised in the other comprehensive income related to continuing operations.

The deferred tax assets and liabilities recognised in the balance sheet are as follows:

Deferred tax assets by origin of the difference	2018	2017
in CHF 000		
Current assets	1180	149
Property, plant and equipment	422	767
Goodwill, software and other intangible assets	4 5 7 3	9 9 0 9
Liabilities and provisions	1635	1 194
Tax loss carryforwards	17411	21 075
Total	25221	33 094
Deferred tax liabilities by origin of the difference		
Current assets	-5239	-15
Property, plant and equipment	-2858	-3117
Goodwill, software and other intangible assets	-20215	-19976
Liabilities and provisions	-1192	-1677
Total	-29504	-24785
Reported in the balance sheet		
Deferred tax assets	10212	15474
Deferred tax liabilities	-14495	-7166
Total deferred tax assets, net	-4282	8 3 0 9

Tax loss carryforwards total to an amount of CHF 431.0 million (2017: CHF 472.9 million). Utilisation of CHF 313.1 million (2017: CHF 311.1 million) of these tax losses is not considered probable and therefore no deferred taxes have been recognised. The predominant part of these tax loss carry forwards does not expire or has its expiration date in more than 5 years.

16 EARNINGS PER SHARE

Earnings per share are calculated by dividing the net profit attributable to the shareholders of Valora Holding AG by the weighted average number of outstanding shares.

	2018	2017
in CHF 000		
Net profit from continuing operations	64 099	57 118
Coupon attributable to providers of hybrid capital	-4000	-4800
Net profit from continuing operations attributable to Valora Holding AG shareholders	60 099	52318
Net (loss)/profit from discontinued operations	-5120	31
Net profit from continuing and discontinued operations attributable to Valora Holding AG shareholders	54979	52 350
Average number of outstanding shares	3 932 706	3 427 949
Earnings per share from continuing operations (in CHF)	15.28	15.26
Earnings per share from continuing operations and discontinued operations (in CHF)	13.98	15.27

In 2018 and 2017 there were no dilutive effects.

17 CASH AND CASH EQUIVALENTS

	2018	2017	
in CHF 000			
Cash on hand and sight deposits	104776	152 515	
Total cash and cash equivalents	104776	152 515	
of which restricted cash	2616	8355	

Valora places significant sight deposits with banks that have a good credit rating (Standard & Poor's rating of A and higher) or with banks that are considered system-relevant. Under IFRS 9, demand deposits are measured at amortised cost.

18 TRADE ACCOUNTS RECEIVABLE

	31.12.2018	31.12.2017	01.01.2017
in CHF 000			
Trade accounts receivable, gross	82 302	74232	49 235
Impairments	-2067	-2964	-3979
Total trade accounts receivable, net	80 235	71 268	45 256

Trade receivables are non-interest bearing.

In October 2017 the acquisition of BackWerk resulted in an increase of trade accounts receivable of CHF 10.6 million. In December 2017 Retail Germany changed the invoicing process of a part of its services. This change resulted in an increase of trade accounts receivable of around CHF 10.0 million. The remaining increase of trade accounts receivable is mainly explained by the significantly higher closing rate of the Euro compared to the CHF (31.12.2017: CHF/EUR 1.170/01.01.2017: CHF/EUR 1.072).

The increase of trade accounts receivable in 2018 was due to higher net revenues mainly in the wholesale business.

The following table shows the change in loss allowances for trade accounts receivable:

	2018	2017
in CHF 000		
Balance on 1 January	2964	3 9 7 9
Recognition of loss allowances through profit or loss	2339	2 5 3 4
Reversal of loss allowances through profit or loss	-1410	-1626
Utilisation of loss allowances	-1612	-2387
Currency translation differences	-214	464
Balance on 31 December	2067	2964

The application of the impairment model under IFRS 9 had no material effect on the measurement of trade receivables. In the previous year, impairment losses on trade receivables were determined in accordance with IAS 39 using the "incurred loss model".

As of the balance sheet date, the ageing structure of trade accounts receivable is as follows:

2018		2017
in CHF 000		
Not yet due	68573	58 687
Less than one month overdue	8059	10944
More than one month, but less than two months overdue	1 422	112
More than two months, but less than four months overdue	695	338
More than four months overdue	1 485	1 186
Total trade accounts receivable, net	80 235	71 268

The payment terms for trade receivables are 30 to 90 days. The underlying contracts have no significant financing components and the amount of the consideration is essentially not determined on the basis of variable external factors. No significant components are based on estimates.

Valora considers trade accounts receivable in default when internal or external information indicates that Valora is unlikely to receive the outstanding contractual amount in full. The impairment loss is recognised taking into account any existing collaterals for this contractual amount.

Under IFRS 9 trade accounts receivable were allocated to different clusters. The expected credit losses on trade accounts receivable not yet due and less than one month overdue were derived from the credit rating of these clusters (0.3% to 1.3% of the relevant outstanding amount). Additional expected credit losses were recognised depending on the expected default rate of the ageing bucket of the outstanding amount (more than one month but less than two months overdue: 1.3% to 2.3%; more than two months but less than four months overdue: 33%; more than four months overdue: 66%).

The trade accounts receivable, net, are in the following currencies:

	2018	2017
n CHF 000		
CHF	42 082	37 081
EUR	37 172	33 320
USD	982	830
GBP	0	37
Total trade accounts receivable, net	80235	71 268

19 INVENTORIES

Total inventories	145 585	154 537
Other inventories	3028	2 530
Semi-finished and finished products	5305	4 690
Merchandise	137 252	147318
in CHF 000	2010	2017

During the financial year, write-downs on inventories of CHF 6.5 million (2017: CHF 6.4 million) were charged to the cost of goods and materials.

20 OTHER CURRENT RECEIVABLES

	2018	2017
in CHF 000		
Value-added taxes and withholding tax receivables	1 195	2 171
Prepaid expenses	30804	18912
Current receivables from financial leases	0	621
Other receivables	23 939	32863
Total other current receivables	55938	54 567

In particular, other receivables include claims for reimbursement of costs as well as receivables due from social security and insurances.

All other receivables measured at amortised cost had good credit ratings (stage 1). The default risk, which in this case is derived from the credit rating, is not material. The introduction of IFRS 9 therefore had no material impact on the measurement of other current receivables.

21 PROPERTY, PLANT AND EQUIPMENT

On 31 December 2018	544 969	47 068	83950	5 5 5 7	681 544

The increase in software and intangible assets with finite useful lives in 2017 contains mainly franchise contracts which were capitalised resulting from BackWerk's purchase price allocation.

Intangible assets with indefinite useful lives. The intangible assets with indefinite useful lives include the brands Ditsch (CHF 23.1 million) and Brezelkönig (CHF 24.0 million). The trademarks were tested for impairment by calculating the value in use of the cash-generating unit Food Service Europe. The revenues used in this calculation are based on three-year business plans. Revenue growth of 1.0% was assumed (2017: 1.0%). The pre-tax discount rates applied are 6.7% for Ditsch and 5.2% for Brezelkönig (2017: 6.9% and 5.4% respectively).

Software and intangible assets with finite useful lives. Software and intangible assets with finite useful lives include CHF 11.8 million (2017: CHF 12.8 million) for software and CHF 72.2 million (2017: CHF 82.8 million) for intangible assets with finite useful lives, of which CHF 13.6 million (2017: CHF 17.8 million) relate to Ditsch/Brezelkönig customer relationships and CHF 49.6 million (2017: CHF 57.2 million) to BackWerk franchise contracts.

Goodwill impairment test. Goodwill is allocated to the following cash-generating units:

Cash-generating units	2018	2017
in CHF 000		
Valora Retail Switzerland	53 730	53 730
Valora Retail Germany	91 143	94 768
Food Service Europe 1)	396 733	407 704
Ditsch USA	3364	3 3 3 3 7
Total carrying amount as at 31 December	544969	559 539

¹⁾ As part of the integration of BackWerk and the change of internal reporting structures, the goodwill on the BackWerk and Ditsch/Brezelkönig acquisitions was tested at the level of the cash-generating unit Food Service Europe in 2018. In prior year Goodwill from the BackWerk acquisition had not yet been allocated, but has been included in the CGU Food Service Europe for illustration purposes only.

Goodwill is tested for impairment based on the estimated future free cash flows (DCF method) taken from the respective business plan of the cash-generating units. These business plans were approved by the Board of Directors and reflect the management's assessment. For cash flows arising after this period a terminal value derived from the third planning year is used. For Ditsch USA a planning horizon of five years was used, to take appropriate account of the capital expenditures in additional production capacity. The following key assumptions were used:

Cash-generating units	Planning horizon	long-term growth rate 1)	Net revenues	Margin trend	
in CHF 000					
Valora Retail Switzerland	3 years	0 %	stable	falling slightly	
Valora Retail Germany	3 years	0 %	falling	rising	
Food Service Europe	3 years	1 %	rising	rising	
Ditsch USA	5 years	2 %	rising	falling slightly	

¹⁾ Beyond the planning horizon

The discount rates are set based on the Group's weighted cost of capital, reflecting country and currency-specific risks affecting the cash flows.

The following (pre-tax) discount rates were used:

	Currency	2018	2017
in CHF 000			
Valora Retail Switzerland	CHF	5.7 %	5.9%
Valora Retail Germany	EUR	7.0%	7.1 %
Food Service Europe	EUR	6.1%	6.2 %
Ditsch USA	USD	11.0%	n.a.

No impairments were charged to the income statement in 2018 and 2017.

Sensitivities. For all goodwill items, the impairment tests for 2018 show that even in the event of an increase in the discount rate of 1.5 percentage points, which is considered to be feasible, or assuming revenues are 5% lower, all resulting values in use exceed the carrying amounts with the exception of Valora Retail Germany. Value in use of this cash-generating unit exceeds the carrying amount by CHF 45 million. In the event of an increase in the discount rate of 1.0 percentage point or assuming revenues are 15% lower, value in use would be equal to the carrying amount of the cash-generating unit.

23 PAYMENTS FROM RENTAL AGREEMENTS AND LEASES

Payments from rental agreements	2018	2017
in CHF 000		
Payments received during the reporting year	45 157	20 267
Due dates of future minimum lease payments under non-cancellable operating lease		
Within one year	31908	39 298
Within 1 – 2 years	25126	32 929
Within 2 – 3 years	18306	27 752
Within 3 – 4 years	13 583	22855
Within 4 – 5 years	7 882	16 980
After more than 5 years	9342	32 482
Total future payments from rental agreements and leases	106 147	172 296

Total future receivables from rental agreements decreased due to the fact that the number of sublease agreements was reduced and larger contracts were not yet prolonged.

Payments from other operating leases	2018	2017
in CHF 000		
Payments received during the reporting year	6376	4 521
Due dates of future payments		
Within one year	4810	4 2 6 3
Within 1-2 years	3865	3 2 3 9
Within 2-3 years	3177	2849
Within 3-4 years	2600	2 282
Within 4-5 years	2027	1 837
After more than 5 years	3114	3 3 9 9
Total future payments from other operating leases	19593	17870

Other operating leases involve point-of-sale facilities that are let to franchisees in Germany.

Financial Leases.

In 2017 Valora's financial leases amounted to total future receivables of CHF 3 336 thousand whereof CHF 547 thousand related to future interest income. The current portion of the present value in the amount of CHF 2 789 thousand was CHF 621 thousand. These finance leases were related to leasehold improvements at the former head office in Bern, which was used by other tenants. In the last quarter of 2018 Valora terminated this contract.

24 FINANCIAL ASSETS

	2018	2017
in CHF 000		
Loans	5 0 8 0	5 292
Receivables from financial leases	0	2168
Other non-current receivables	5044	15088
Other non-current financial assets	649	649
Total financial assets	10773	23 197

Other non-current receivables mainly represent the remaining amount from the sale of the property in Muttenz in 2012, which is offset against the receivables from a right of use secured by a mortgage over the next four years until 2022. In 2017 the earn-out from the sale of the Trade Division (see Note 34) and a guarantee claim in the amount of CHF 3.0 million, which was paid in 2018, were included additionally. Other non-current financial assets in the amount of CHF 649 thousand (2017: CHF 649 thousand) include unlisted participation rights measured at fair value through profit or loss.

25 CURRENT FINANCIAL LIABILITIES AND OTHER NON-CURRENT LIABILITIES

Current financial liabilities	2018	2017
in CHF 000		
Current bank debt	185133	16670
Current bond liabilities	0	199990
Total current financial liabilities	185 133	216 660
Other non-current liabilities		
in CHF 000	2018	2017
in CHF 000	2018	2017 175 421

The syndicated loan facility of CHF 200 million is currently not being utilised.

The increase in the promissory notes is attributable to the BackWerk acquisition (EUR 170 million in January 2018) whereof EUR 77.9 million were reclassified to current financial liabilities.

Other non-current liabilities include financial liabilities (mainly deposits) in the amount of TCHF 6245 (2017: TCHF 6550) and other liabilities (primarily onerous contracts and jubilee benefits) in the amount of TCHF 6181 (2017: TCHF 8583).

Bond	Nominal value	2018 Carrying amount	2017 Carrying amount
in CHF 000			
2.50% bond 2012-2018	200 000	0	199 990

The bond of CHF 200 million was repaid in March 2018.

Maturities at year end are as follows	2018	2017
in CHF 000		
Within one year	185 133	216660
Within 1-2 years	1398	92813
Within 2-3 years	82345	1 499
Within 3-4 years	1172	85 668
Within 4-5 years	192128	819
After more than 5 years	1178	1 172
Total financial liabilities	463 354	398 632
Current portion of financial liabilities	-185133	-216660
Total non-current portion of financial liabilities	278221	181971

The interest rates on financial liabilities ranged between 0.1% and 3.0% (2017: between 0.1% and 4.0%). The weighted average interest rate on financial liabilities was 1.9% (2017: 3.0%). Non-current financial liabilities are denominated in the following currencies:

	2018	2017
in CHF 000		
CHF	691	148
EUR	277 530	181 823
Total non-current financial liabilities	278221	181 971
Other non-current liabilities	6181	8 583
Total other non-current liabilities	284402	190 554

26 TRADE ACCOUNTS PAYABLE

Trade accounts payable are denominated in the following currencies:

	2018	2017
in CHF 000		
CHF	92398	101 037
EUR	43 786	41917
Other	362	384
Total trade accounts payable	136546	143 339

27 OTHER CURRENT LIABILITIES

	2018	2017
in CHF 000		
Value-added tax and other taxes	3 985	4 887
Personnel and social security	1302	1 597
Accruals for overtime, vacation and variable salary components	6162	5 6 2 5
Liabilities to pension funds	1021	1729
Accrued expenses	44748	53 407
Other current liabilities	27 381	34012
Total other current liabilities	84 599	101 257

Accrued expenses primarily include accruals for agency fees, goods and services purchased as well as accrued interest. Other current liabilities mainly include liabilities from rent and ancillary rental costs as well as liabilities from investments in property, plant and equipment and intangible assets.

28 PROVISIONS

Guarantees: Warranty provisions of CHF 10.6 million were recognised based on contractual arrangements for the sale of the Trade division in 2015. Following the expiry of contractual obligations, a portion amounting to CHF 7 million was released in 2017.

In 2018 the remaining provision of CHF 3.6 million was released to net profit from discontinued operations in the amount of CHF 2.6 million because the warranty period has expired or a claim is no longer expected. CHF 1.0 Million was offset against the deferred purchase price.

29 PENSION OBLIGATIONS

In line with statutory requirements, most employees are insured by pension schemes that are funded by the Valora Group and its employees. These institutions include state or self-funded insurance, private insurance companies, independent foundations and pension funds. The benefits provided by these institutions vary according to the legal and economic conditions in each country, but they are mainly based on length of service and the employee's average salary and they generally cover the risks of old age, death and disability in line with statutory provisions on occupational benefits.

Most Valora employees in Switzerland are insured by the autonomous Valora pension fund against the risks of old age, death and disability. Ordinary employer contributions include age-related risk premiums of 1.0-3.0% as well as savings contributions of 4.0-12.0% of the insured salary in credits to individual saving accounts. Benefits are defined in the pension fund regulations of the Valora Pension Fund, with minimum benefits defined by law. The ordinary retirement age is 65 for men and 64 for women. After they turn 58, Valora employees have the right to early retirement, with the conversion rate being reduced in line with the longer expected pension period. The amount of the pension that is paid out is based on the conversion rate applied to the individual beneficiary's accumulated saving accounts when they retire. For ordinary retirement after reaching age 65 or 64, the conversion rate is currently 6.20% (2017: 6.40%). The conversion rate will be reduced by 0.20% to 6.00% in 2019. The accumulated saving accounts are made up of savings contributions from employers and employees as well as interest credited to the saving accounts. The interest rate is set annually by the Board of Trustees of the Valora Pension Fund. The legal form of the Valora Pension Fund is a foundation. The Board of Trustees, which is comprised of an equal number of employer and employee representatives, is responsible for managing the foundation. The duties of the Board of Trustees are defined in the Federal Act on Occupational Old Age, Survivors' and Invalidity Pension Provision (BVG) and the pension fund regulations of the Valora Pension Fund. A temporary shortfall is permitted under the BVG. In order to remedy a shortfall within a reasonable period of time, the Board of Trustees is obliged to initiate remedial measures. If there is a significant shortfall, additional employer and employee contributions may be imposed under the BVG.

Day-to-day business is managed by the plan administrator under the supervision of the Board of Trustees. The plan administrator periodically informs the Board of Trustees about developments. The foundation bears all actuarial risks. These are divided into demographic (in particular, changes in mortality) and financial risks (in particular, changes to the discount rate, changes to wages and the return on plan assets). The Board of Trustees assesses the risks on a regular basis. To this end, an actuarial report is prepared once a year in accordance with the provisions of the BVG. This report is not prepared using the projected unit credit method. The Board of Trustees is responsible for investments. If necessary, it redefines the investment strategy, particularly in the event of significant changes on the market or to the structure of plan participants. The investment strategy takes account of the foundation's risk capacity as well as the plan's benefit obligations and is set out in the form of a target long-term asset structure (investment policy). The aim is to achieve a medium- and long-term balance of plan assets and obligations under the pension plan.

The last actuarial evaluation was prepared as at 31 December 2018. The assets of the pension schemes are invested in accordance with local investment regulations. Valora pays its contributions to pension schemes on the basis of the rules specified by the pension scheme.

Other employees in Germany and Austria are also insured by various, smaller unfunded pension plans.

Change in liabilities and assets	2018	2017
in CHF 000		
Present value of defined benefit obligation at the beginning of the year	516717	524 125
Service cost	6738	6700
Employee contributions	4 903	4896
Interest costs	2799	2851
Plan amendments, curtailments, settlements	-8839	-9877
Additions to the scope of consolidation	4236	1321
Benefits paid	-29029	-24096
Actuarial losses/(gains) from obligations	-9644	10771
Currency translation differences	-11	27
Present value of defined benefit obligation at year-end	487870	516717
Market value of pension assets at the beginning of the year	577 568	530424
Interest income	3130	2883
Employer contributions	6963	6755
Employee contributions	4903	4896
Plan amendments, curtailments, settlements	-7210	-7358
Additions to the scope of consolidation	4141	1270
Benefits paid	-29001	-24062
Actuarial (losses)/gains from assets	-828	63 551
Other pension costs	-788	-791
Market value of pension assets at year-end	558878	577 568

The pension assets calculated at fair value all relate to the Swiss pension schemes. The Group expects to pay employer contributions of CHF 6.6 million in 2019.

Balance sheet values	2018	2017
in CHF 000		
Present value of funded pension obligations	-487 596	-516410
Fair value of pension assets	558878	577 568
Excess/(shortfall) of fund-financed plans	71 282	61 158
Asset ceiling effect	-71282	-61158
Present value of unfunded pension obligations	-274	-307
Total net pension obligation	-274	-307

The weighted average duration of the defined benefit obligation is 12.4 years (2017: 12.9 years).

The net pension obligation developed as follows:

	2018	2017
in CHF 000		
1 January	-307	-309
Additions to the scope of consolidation		-51
Pension expense, net in profit or loss	-5902	-4976
Employer contributions	6991	6 789
Actuarial losses in other comprehensive income	-972	-1732
Currency translation differences	11	-27
31 December	-274	-307
-	0010	0017
Income statement	2018	2017
in CHF 000		
Service cost	-6738	-6700
Interest costs	-2799	-2851
Plan amendments, curtailments, settlements	1 629	2519
Interest on effect of asset ceiling	-336	-36
Interest income	3130	2883
Other pension costs	-788	-791
Actuarial net pension expense	-5902	-4976

Income from plan amendments in the amount of CHF 1.6 million are due to the reduction in the conversion rate and the conversion of own outlets to agencies.

Actuarial gains/losses	2018	2017
in CHF 000		
Changes in financial assumptions	16463	-51
Experience adjustment on defined benefit obligation	-6914	-10771
Gain on pension assets (excluding interest based on the discount rate)	-828	63 551
Asset ceiling effect	-9788	-54512
Actuarial losses of the period	-1067	-1783
Total actuarial gains/losses recognised in other comprehensive income	2018	2017
in CHF 000		
1 January	-90904	-89477
Actuarial losses	-1067	-1783
Deferred taxes	213	356
31 December	-91758	-90904
Significant actuarial assumptions	2018	2017
in CHF 000		
Discount rate (Switzerland only)	0.75%	0.55%
Future salary increases (Switzerland only)	1.00%	1.00%

Calculations in Switzerland were carried out using the BVG 2015 mortality table (generation table).

Sensitivity analysis	2018	2017
in CHF 000		
Discount rate (+0.25%)	-13622	-15281
Discount rate (-0.25%)	12915	14470
Change in salaries (+ 0.50 %)	631	743
Change in salaries (-0.50%)	-630	-777

Only one of the assumptions is adjusted in the analysis while all other parameters remain unchanged.

Asset allocation	2018	2017
in CHF 000		
Cash and cash equivalents	5.70%	6.80%
Bonds	32.90%	26.70%
Equities	27.10%	31.10%
Real estate	31.30%	30.00%
Other	3.00%	5.40%
Total	100.00%	100.00%

With the exception of real estate, all assets have quoted prices in active markets.

The effective income from plan assets is CHF 1.5 million (2017: CHF 65.6 million). The effective return for 2018 was 0.3% (2017: 12.4%). The pension schemes do not hold any Valora Holding AG securities and do not let significant portions of their real estate to the Valora Group.

30 SHARE-BASED REMUNERATION

their shares based on their period of employment.

The following share-based remuneration programmes are available for the Board of Directors, management and employees:

Share participation programme for the Board of Directors. Under the regulations for the Board of Directors, 20% of the individual total compensation of members of the Board of Directors is generally paid out in blocked registered shares. In justified cases, the Board of Directors may decide to pay a higher or lower percentage of the total compensation in shares. The shares are generally subject to a blocking period of three years. The shares remain in a Valora securities account during the blocking period. Board members are prohibited from selling, pledging or otherwise transferring the shares. After the end of the blocking period, members can freely dispose of the shares.

During the reporting year, the members of the Board of Directors received 20% of their total compensation in shares in the quarter following the Ordinary General Meeting.

Share participation programme (SPP) for Group Executive Management. With effect from 1 November 2015, a management share participation programme was introduced for members of Group Executive Management and selected members of Extended Group Executive Management. Under the SPP, shares are granted as a component of compensation in accordance with the relevant employment contract. Participants receive shares of Valora Holding AG with all of the rights of a normal shareholder, apart from the three-year lock-up period. The allocation of shares is not subject to any further service conditions. Each calendar year, 50% of the shares allocated will be granted on 31 March and 50% on 30 September as part of the compensation for the first or second half respectively of the corresponding calendar year. Employees who join or leave the company during the year will receive a pro rata allocation or be required to return

The fair value of the compensation is the share price on the grant date (31 March) multiplied by the quantity of allocated shares. This amount is recognised as expense through profit and loss in the calendar year.

Share participation programme for employees. Employees in Switzerland (members of Group Executive Management are excluded from the programme) are entitled to acquire shares of Valora Holding AG at a preferential price at the beginning of the following year based on certain criteria and function/management level. The price is 60% of the average market price in November of the previous year. The shares are acquired with all rights, but they cannot be sold for three years. The proceeds of these sales to employees are credited directly to equity.

Total expense recognised for share-based remuneration	3 187	2758
Expenses for Valora Group employees and management share participation plans (equity settled)	3 187	2758
in CHF 000		
Recognised personnel expense for share-based remuneration for personnel and the Board of Directors	2018	2017

31 CONTINGENT LIABILITIES, OBLIGATIONS FROM LEASES AND OTHER AGREEMENTS

Contingent liabilities	2018	2017
in CHF 000		
Guarantees	6 2 5 5	7361
Total contingent liabilities	6255	7 3 6 1
Future obligations from operating leases and other agreements	2018	2017
in CHF 000		
Future rent obligations	711373	746 266
Future obligations from other operating leases	4911	4 483
Future obligations from other agreements	49861	39 797
Total future obligations	766 145	790 546

Rental agreements	2018	2017
in CHF 000		
Minimum rental expense	181777	142441
Variable rental expense	19158	26 440
Total rental expense	200 935	168881
Due dates of future rental obligations		
Within one year	172894	171 085
Within 1 – 2 years	156578	154715
Within 2 – 3 years	111359	135911
Within 3 – 4 years	87 989	89888
Within 4 – 5 years	70810	66 283
After more than 5 years	111744	128384
Total future obligations from rental agreements	711373	746 266

The long-term rental contracts have been concluded in order to secure long-term access to the sites concerned. Most of the rental contracts contain variable, sales based components.

Other operating leases	2018	2017
in CHF 000		
Total expense for other operating leases during the reporting year	3418	2 407
Due dates of future obligations from other operating leases		
Within one year	2096	2 052
Within 1 – 2 years	1519	1 259
Within 2 – 3 years	805	675
Within 3 – 4 years	343	376
Within 4 – 5 years	148	121
Total future obligations from other operating leases	4911	4 483

The future obligations from other operating leases mainly relate to vehicle leases.

Other agreements	2018	2017
in CHF 000		
Due dates of future obligations from other agreements		
Within one year	23 780	28 271
Within 1 – 2 years	7374	7 953
Within 2 – 3 years	5608	1 559
Within 3 – 4 years	5 3 5 0	1071
Within 4 – 5 years	4428	943
After more than 5 years	3321	0
Total future obligations from other agreements	49861	39 797

The future obligations from other agreements primarily relate to outsourcing agreements.

32 RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

By virtue of the international nature of its business operations and its financing structure, the Valora Group is exposed to financial risks. These not only include market risks such as foreign exchange and interest rate risks, but also liquidity and credit risks. Valora's financial risk management activities aim to limit these risks. The financial risk policy is determined by Group Executive Management and monitored by the Board of Directors. Responsibility for implementation of the financial policy as well as for financial risk management rests with the central Corporate Treasury.

Sensitivity analyses that show the effects of hypothetical changes in relevant risk variables on earnings before income taxes and other comprehensive income are used to present market risks. These effects are determined by assuming hypothetical changes in the risk variables and assessing their impact on the financial instruments. The hypothetical changes in interest rates relate to the differences between the expected interest rates at the end of the following year and the current values on the balance sheet date. The hypothetical changes in currencies correspond to the one-year volatility as at the balance sheet date.

Foreign currency risks. Transaction risks arise when the value of foreign currency transactions fluctuates as a result of changes in the exchange rate of the functional currency. For Valora, transaction risks arise when it obtains goods and services in a currency other than the functional currency and as a result of intra-group transactions. Most Group companies mainly carry out their transactions in the functional currency. According to IFRS currency risks do not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. In order to limit the transaction risks, currency derivatives are used selectively.

Translation risks arise when translating the balance sheets and income of foreign Group companies as part of consolidation and the resulting change in equity.

Net investments in foreign Group companies are also periodically analysed and the risks are measured using the volatilities of the corresponding currencies. These analyses show that the translation risks are acceptable compared to consolidated equity. The translation risks are not hedged and are not included in the currency sensitivities presented below.

The following table shows the material effects on earnings before income taxes and other comprehensive income as a result of hypothetical changes to the relevant foreign exchange rates of the financial instruments.

Currency sensitivity analysis	Hypothetical change (percent) 2018	Impact on earnings before income tax 2018	Impact on other comprehensive income 2018	Hypothetical change (percent) 2017	Impact on earnings before income tax 2017	Impact on other comprehensive income 2017	
in CHF 000							
CHF/EUR	+/-5.1%	+/-1347	+/-9549	+/-5.0%	+/-9570	+/-9694	

In 2017, the Euro exposure was significantly higher due to the BackWerk acquisition (in EUR), as the promissory note in the amount of EUR 170 million was placed on 11 January 2018 and the transaction was financed in Swiss francs until that date.

Interest rate risks. The Group's interest-bearing assets mainly comprise cash and cash equivalents. Due to the variable interest rate on cash and cash equivalents, the amount of income is influenced by the development of market interest rates. The Group's interest rate risk normally arises in connection with financial liabilities. Financial liabilities with variable interest rates result in a cash flow interest rate risk for the Group. Financial liabilities with fixed interest rates, on the other hand, expose the group to the risk of shifts in the fair value of its liabilities. In order to achieve the desired balance of fixed and variable interest rates, the Group enters into interest rate hedges where needed. Interest-bearing liabilities consist mainly of a promissory note (see Note 25).

The sensitivity analysis of the interest rate risk only includes items with variable interest rates. The following table shows the material effects on earnings before income taxes as a result of hypothetical changes to the relevant market interest rates.

Interest rate sensitivity analysis	Hypothetical change (basis points) 2018	Impact on earnings before income tax 2018	Hypothetical change (basis points) 2017	Impact on earnings before income tax 2017	
in CHF 000					
CHF	+/-27	+/-86	+/-27	+/-205	
EUR	+/-21	+/-132	+/-34	+/-68	

Liquidity risks. Liquidity risk management refers to the Group's ability to meet its payment obligations in full and in a timely manner at all times. Valora's Group liquidity is monitored on an ongoing basis and optimised through cash pool arrangements. Liquidity reserves in the form of credit limits and cash are designed to ensure constant solvency and financial flexibility.

The following table shows the undiscounted interest and principal payments of the Group's non-derivate financial liabilities. All instruments in the portfolio at the end of the year are included. The closing interest rates are used to calculate variable interest payments.

	Up to 1 month	From 1 to 3 months	From 3 months to 1 year	From 1 to 5 years	More than 5 years
in CHF 000					
As at 31 December 2018

Non-current financial liabilities	0	5020	3628	201117	685
Total	202911	227 929	14662	201 117	685

In order to optimise its ability to manage liquidity, the Valora Group has several different credit facilities in place, both at fixed and floating rates of interests, which have not been fully drawn.

Credit risks. Credit risks arise when contractual parties are unable to fulfil their obligations as agreed. Valora's receivables are reviewed on an ongoing basis and managed so that no significant credit and concentration risks arise. As at the end of 2018 and 2017, the Valora Group had no receivables from individual customers representing more than 6% of total trade accounts receivable.

The Valora Group works with a selected number of reputable banking institutions. Specific situations may require subsidiaries to transact business with other banks. New banking relationships are established and existing ones terminated in consultation with Corporate Treasury. Corporate Treasury reviews the banking relationships on a regular basis using external ratings and defines credit limits for all counterparties.

The maximum default risk of the financial assets of CHF 241 million (2017: CHF 291 million) corresponds to the carrying amounts (see Note 33).

The following table shows the Group's demand deposits and fixed term deposits with maturities of 3 months or less by bank counterparty rating. The table uses Standard & Poor's rating codes.

$\label{lem:deposits} \textit{Demand deposits and fixed term deposits with maturities of less } \\ \textit{than three months}$	2018	2017
in CHF 000		
AAA and/or state guarantee (AAA countries)	54	76
AA	4372	12078
A	56 033	76 158
BBB	3750	24611
No Rating	1952	1710
Total demand deposits and fixed term deposits with maturities of less than three months ¹⁾	66 161	114633

¹⁾ The other components of the balance sheet item cash and cash equivalents is comprised of cash holdings (including cash in transit).

Risk management instruments (hedging). The Valora Group uses forward contracts to mitigate foreign currency risks. In addition, interest rate swaps are used to hedge interest rate risks. Exposure arising from existing asset and liability items, as well as from future commitments, is managed centrally.

To hedge 50% of the interest expense of the bond issued on 1 February 2012 (see Note 25), a forward-starting interest rate swap was entered into in the first half of 2011. This interest rate swap was designated as a hedging instrument to hedge the interest payments on the bond (cash flow hedge). On 1 February 2012, the interest rate swap was closed with a negative replacement value of CHF 10.4 million. In financial year 2018, CHF 0.3 million (2017: CHF 1.7 million) of other comprehensive income was reclassified to financial expense. The hedged payments relate to the years 2012 to 2018 and are recognised through profit and loss during this period.

The table below shows both the notional amounts of the Group's positions in derivative financial instruments as well as their aggregate replacement values. The information, which is presented by instrument type, relates to valuations at balance sheet dates.

Notional amounts show the volume of the underlying transactions at the balance sheet dates. They do not contain any information about the market risk these positions involve. The replacement value of these positions has been determined by valuations provided by the counterparty, market prices at 31 December 2017 and 2018 or through standard pricing model valuations using market data.

Derivative financial instruments	Notional amount 2018	Replacement values 2018	Notional amount 2017	Replacement values 2017
in CHF 000				
Currency instruments				
Forward contracts/ derivative financial liabilities	0	0	170000	1 035
Total derivative financial liabilities	0	0	170000	1 035

Capital management. The primary goal of capital management at the Valora Group is to achieve a high credit rating and a good equity ratio. This serves to support the Group's business activities and maximise shareholder value.

The Valora Group manages its capital structure and makes adjustments in response to changes in the economic circumstances. The Valora Group can undertake various measures to maintain or adjust its capital structure, such as modifying dividend payments to shareholders, repaying capital to shareholders or issuing new shares.

Capital is monitored with the help of the equity ratio, which is calculated as the percentage of equity to total assets. The Group's capital and equity ratio are listed in the following table:

	2018	2017
in CHF 000		
Equity of Valora Holding AG	613781	737 924
Total equity	613781	737 924
Equity ratio	46.3%	52.4%

The decrease in equity is due to the repayment of CHF 120 million of hybrid equity at the end of October 2018.

With the exception of bob Finance AG, Zurich, the Valora Group is not subject to external capital requirements, such as those that apply in the financial services sector. The minimum equity ratio requirements are based on the financial covenants in the bank loan agreements (see Note 25).

bob Finance AG is subject to the shareholders' equity requirements set out in Art. 5 of Switzerland's Ordinance relative to the Federal Law on Consumer Credit (VKKG). The equity of bob Finance AG must amount to at least CHF 250000 or 8% of outstanding consumer loans.

¹⁾ Due to the change from IAS 39 to IFRS 9, other non-current financial assets as at 1 January 2018 with a carrying amount of CHF 649 thousand were reclassified from "available-for-sale financial assets measured at cost" to "measured at fair value through profit or loss".

LaR Loans and receivables
FAHfT Financial assets held for trading
AfS Financial assets available for sale
FLAC Financial liabilities at amortised cost
FLHfT Financial liabilities held for trading

FLtPL Financial liabilities measured at fair value through profit or loss

For all current financial instruments measured at amortised cost, the carrying amounts represent a reasonable approximation of their fair value. Any discounting effects are immaterial. The bond of CHF 200.0 million was repaid in March 2018. Information on the measurement of derivative financial instruments and other non-current financial assets can be found in Notes 4, 24 and 32. The fair values of other non-current fixed-income financial instruments were determined by discounting the expected future cash flows using standard market interest rates.

34 FAIR VALUES

Hierarchy levels applied to fair values. Fair values are allocated to one of the following three hierarchy levels:

- Level 1: Price quotations on active markets for identical assets and liabilities;
- Level 2: Fair values determined on the basis of observable market data. For this purpose, either quoted prices on non-active markets or unquoted prices are used. These fair values can also be derived indirectly from prices;
- Level 3: Fair values determined on the basis of unobservable inputs and thus based on estimates.

The following tables show the fair value of assets and liabilities by hierarchy level:

2018	Level 1	Level 2	Level 3	Total
in CHF 000				
Measured at fair value				
Assets				
Other non-current financial assets	0	0	649	649
Liabilities				
Contingent consideration	0	0	-382	-382

2017	Level 1	Level 2	Level 3	Total	
in CHF 000					
Measured at fair value					
Assets					
Contingent consideration	0	0	7 608	7 608	Γ
Liabilities					
Derivative financial liabilities	0	1 035	0	1 035	Γ
Contingent consideration	0	0	2077	2077	
Disclosed at fair value					
Liabilities					ļ
Bonds	200820	0	0	200820	Γ

Level 2 fair values are determined using measurement models that are based on observable market data, such as interest rates, yield curves and exchange rates on the measurement date.

In reporting years 2018 and 2017, there were no transfers between hierarchy levels 1 and 2.

Level 3 fair value. The following table shows the change in level 3 fair values from the opening balances to the closing balances:

	2018	2017
in CHF 000		
Contingent consideration - Asset		
Balance on 1 January	7608	16295
Fair value adjustment recorded in discontinued operations	-7608	-8687
Balance on 31 December	0	7 608
	2018	2017
in CHF 000		
Other non-current financial assets - Asset		
Balance on 1 January	0	0
Reclassification of other non-current financial assets	649	0
Balance on 31 December	649	0
	2018	2017
in CHF 000		
Contingent consideration - Liability		
Balance on 1 January	2077	0
Addition	382	2077
Payments	-2077	0
Balance on 31 December	382	2 077

Contingent considerations. The conditional earn-out recognised as an asset in hierarchy level 3 arose from the sale of the Trade division in 2015. The amount of the earn-out varies from zero to a maximum of CHF 20 million and is calculated as a percentage of the relevant consolidated EBITDA for the years 2016 to 2018 when exceeding contractually defined thresholds of each year. The fair value is calculated as the net present value of the forecast cash flow. The material unobservable parameter is the estimate of the consolidated EBITDA. Fair value was reduced in 2017 by CHF 8.7 million due to a reassessment of the probability of the operating earnings and forecast cash flows occurring.

The fair value was reduced to zero at 31 December 2018 as information received indicated that the consolidated EBITDA of the disposed Trade division was likely to be well below the relevant threshold for 2018 and as a result no earn-out payments could be expected anymore (see Note 7).

A contingent consideration liability was recognised as part of the purchase price agreement concerning the acquisition of the pretzel manufacturer Pretzel Baron. The consideration is calculated on the basis of the achievement of projected sales figures. The recognised liability was paid in full in June 2018.

A contingent consideration was determined as part of the purchase price agreement concerning the acquisition of BackWerk. The contingent consideration in the amount of EUR 1.0 million was triggered by the signing of specific rental contracts (see Note 6) and was paid in November 2018.

As part of the purchase price agreement concerning the acquisition of Presse + Buch Grauert a contingent consideration in the amount of CHF 0.4 million was set. The payment will be due in April 2019 and represents a security deposit that Valora claimed.

35 TRANSACTIONS AND BALANCES OUTSTANDING WITH RELATED PARTIES

The consolidated financial statements comprise Valora Holding AG as the parent company and the Group companies controlled by it, either directly or indirectly, which are listed in Note 38.

Transactions. The following transactions were conducted with related parties:

Goods and services sold to related parties	2018	2017
in CHF 000		
Goods sold to		
Related parties	0	2847
Services sold to		
Associates and joint ventures	43	28
Other related parties	158	151

In 2018, a dividend of CHF 12.50 per share was paid for the financial year 2017 (2017: CHF 12.50 per share for financial year 2016). The dividend distribution is based on the annual profit and the profit carried forward of Valora Holding AG.

The share capital comprises 3990000 shares with a par value of CHF 1.00 each. At the extraordinary General Meeting of Valora Holding AG on 8 November 2017, the shareholders approved a capital increase of CHF 554401 through the issue of 554401 registered shares with a par value of CHF 1.00 each. The capital increase was carried out via a rights issue at market price. Existing shareholders of Valora Holding AG received one subscription right for each registered share they held after the close of trading on 10 November 2017. Five subscription rights grant their owners the right to subscribe for one new registered share. The subscription price was CHF 310. Total proceeds from the capital increase amounted to CHF 171.9 million and were reduced by the transaction costs in the amount of CHF 6.1 million.

At the Ordinary General Meeting of Valora Holding AG on 13 April 2018, shareholders approved the creation of authorised share capital of up to CHF 400,000 by issuing a maximum of 400,000 registered shares with a nominal value of CHF 1 by no later than 13 April 2020.

There is contingent capital of 84,000 shares that the Board of Directors may issue to secure existing and future management share participation plans. As of 31 December 2018, no corresponding shares had been issued.

37 SUBSEQUENT EVENTS

Valora placed a promissory note in the amount of EUR 100 million and CHF 63 million with a five-year term on the banking market. The transaction was closed on 11 January 2019.

These consolidated financial statements were authorised for issue by the Board of Directors of Valora Holding AG on 18 February 2019. The Board of Directors recommends that the Ordinary General Meeting of Shareholders to be held on 29 March 2019 approve these financial statements.
